

ABOUT ME

- Diverse Experience**
With over 6.6+ years of overall experience and more than 5 years of practical involvement in creating, designing, and launching Kotlin-driven mobile apps. Possessing a solid understanding of MVVM architecture and a successful history of delivering production-ready applications for sectors like banking, travel, automotive and retail.
- Technology Proficiency**
Proficiency in leading tech stacks with expertise in building mobile applications from scratch with streamlining and optimization of varied bugs/issues encountered. Expertise in leveraging technology as a strategic enabler for performance optimization and operational efficiency across diverse development environments
- Achievements and Stewardship**
 - Received Project Excellence and Contribution awards at Tata Elxsi for outstanding performance, delivering high-quality, user-centered applications.
 - Led a successful Android team at Infosys, achieving a top-rated mobile banking app, improving app performance by 15%, and enriching user experience with accessibility features such as talkback, UI component focus management for visually impaired people.
 - Cultivated a culture of growth and learning by mentoring junior team members.
- Versatility and Eloquence**
Capable of adapting to various work environments, situations and methodologies with exceptional writing and communication abilities.

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER
EPAM SYSTEMS

Pune, India
October 2025 - Present

- Project:** MAFE-PARK (Smart Parking App)
 - Architected the MAFE-PARK booking module using MVI and UDF, ensuring 100% state predictability across complex, multi-step reservation journeys.
 - Engineered a high-performance Jetpack Compose UI with custom graphics, optimizing recomposition to maintain a consistent 60 FPS experience during intensive updates.
 - Established strategic Git branching and modular patterns, reducing booking friction and improving responsiveness by 15%, setting a new technical benchmark for Mall of the Emirates.
- Client:** Majid Al Futtaim Emakina

SENIOR SOFTWARE ENGINEER
TATA ELXSI

Pune, India
December 2022 - August 2025

- Tech Stack:** Android, Kotlin, MVVM, Retrofit, Git, Compose, Coroutines, Hilt, JUnit
- Project:** Vehicle Diagnostic App
 - Created a Bluetooth based vehicle diagnostics app by following SOLID principles using CLEAN with MVVM, implementing secure transport (SSL pinning, encrypted storage) and leak-safe lifecycles.
 - Improved crash rate and memory footprint with LeakCanary-driven fixes, cutting memory leaks by 10% and stabilizing long-running sessions; validated with JUnit/Espresso.
- Client:** Mahindra & Mahindra
- Project:** Car Companion Mobile App
 - Crafted an intelligent mobile application featuring Gemini-integrated voice interaction and route planning with real-time data. Utilized Jetpack Compose and ML APIs to elevate user experience.
 - Implemented multilingual support, achieved a 20% performance gain by refactoring legacy code, and earned Project Excellence awards for 100% on-time delivery.
- Client:** Tata Motors

SENIOR SYSTEM ENGINEER
INFOSYS

Pune, India
September 2019 - November 2022

- Tech Stack:** Android Development, Kotlin, MVVM, Retrofit, Git, Compose
- Project:** HSBC Banking App (London)
 - Developed a comprehensive mobile banking app prioritizing accessibility for visually impaired users. Implemented MVVM architecture, integrated multiple banking APIs for distinguished domains, and enhanced performance using Coroutines, Retrofit, and ConstraintLayout.
 - Ensured code quality through unit testing with Mockito. Adhered to UI/UX guidelines, utilized JIRA, Confluence, and GitHub within an Agile framework.
 - Awarded best team for delivering a high-quality app.
- Client:** HSBC Bank
- Project:** L3 - Support , Service Now (2019 - 2020)
 - Handled M3 Admin related activities, analyze requests, Routed calls and tickets to appropriate resources and Domains who can best support user using Service Now.
- Client:** Infor M3

INTERNSHIP

Jhansi, India
June 2017 - July 2017

- Project:** Rail Employee Info App
Built an employee info Android app (Indian Railways EDP) with Kotlin and Room DB; implemented ConstraintLayout for responsive UI across multiple screen sizes, reducing search response time and slow frames from 12% to 5%, integrated Firebase Authentication for secure user access.

SKILLS

- Programming languages :**
Kotlin
- Libraries/Frameworks :**
Jetpack Compose
Coroutines Android SDK
Crashlytics JUnit
Mockito Espresso
- Tools/ Platforms :**
Android Studio GitHub
Confluence Postman
Figma JIRA
VCS: Git, Gerrit Claude Code
- Third Party SDK Integration:**
Retrofit Picasso
GSON LeakCanary
- Databases:**
Room Firebase
- Dependency Injection:**
Dagger2 Hilt
- Architecture:**
MVI CLEAN
MVVM
- Design Principles:** SOLID
- Security:** AES, SSL Pinning, R8
- Navigation:** Compose Navigation

EDUCATION

B.Tech in Computer Science Engineering from
Pranveer Singh Institute of Technology (AKTU) Kanpur
August 2015 - September 2019

CERTIFICATIONS

- Internship: Android Development, Indian Railways EDP Dept.
- Online Certifications: Android Development Courses, LinkedIn Learning

HONORS & AWARDS

- Project Excellence Award, April 2023
- Best Android Team Award, Jan 2022
